Grapes

59800-Black Monukka – 2 year Potted \$11.99

Seedless. Clusters are large and long. Medium to large, oval, reddish black grapes; mostly seedless. Crisp flesh, sweet flavor. Excellent for all uses, especially fresh or raisin. Self Fruitful. Ripens in early September

13890 Canadice-2 year \$5.99

American. Hardy, seedless, red grape. Large, long, well filled, large shouldered clusters. Medium size, firm fruit. Excellent, spicy, grapey flavor. Outstanding quality. Excellent table grape. Fine for juice, jelly and wine. Reliably productive. Harvest from mid-August through September.

13895 Concord -2 year \$5.99

V. labrusca hybrid. Standard of quality for bluish black grapes. Large, well filled clusters of glossy, medium size, round, slipskin, bluish black berries overspread with bloom. Excellent, distinctive flavor that virtually identifies bottled U.S. grape juice. Used for table juice, jelly and wine. Vigorous, hardy, strong growing, productive vine. Self-fruitful. Ripens in late September.

23180-Golden Muscat – 2 year \$5.99

American Grape. Large, dense, well filled, compact clusters; some clusters can weigh 7lbs. Large, slipskin, egg-shaped green berries maturing to pale golden yellow. Tantalizing Muscat aroma. European Muscat flavor. Excellent quality when well ripened. Train vines for good air circulation to reduce bunch rot. Ripens late September to mid October.

28242 Himrod 2 year \$5.99

American grape. Seedless. Large, long loose clusters. Medium size, oval seedless golden yellow fruit. Crisp but tender skin. Sweet, delicious, juicy flesh. Fine quality table variety. Pure,, sweet juice of delicate flavor. Makes excellent raisins. Self fruitful.

47148 Interlaken 2 year Potted \$11.99

American grape. Seedless. Medium size, fairly tight, varying clusters. Small to medium, golden berries. Crisp, solid, meaty, sweet flesh. Pleasant, tangy flavor. Fine for eating fresh; , excellent for raisins. Vigorous, disease resistant vines. Self fruitful. Compact grower.

59810 Merlot Potted \$11.99

European grape. Medium size, round, deep black fruit. Produces large yields of high quality, rich, red wine; often blended with Cabernet. Self Fertile. Ripens from August to September. Low Chill.

75543 Suffolk Red Seedless \$5.99

Long, loose, medium to large clusters. Round, firm, meaty, seedless berries vary from bright red to pink. Tender skin; crisp, juicy flesh. Pleasing spicy sweet flavor. Excellent quality. Fine table grape. Self fruitful. Almost disease free.

Elderberries

100794 Nova \$7.99

Large, sweet blue fruit. Ripens evenly and a bit earlier than York. Pollinate with York.

100797 York \$7.99

Juicy, sweet, purplish black berries. Large creamy white flowers in spring. Pollinate with Nova

Goji Berry

45860 Goji Berry Liner (not bareroot) \$16.99

Bright red fruit used either fresh or dried. Contains the highest antioxidant level of any fruit type. Drought tolerant once established and very cold hardy.

Gooseberries & Currants

84765 Cherry Red Currant \$4.99

Red Cherry currants fruit clusters are short and loose. The berries are very large, bright dark red, acidic and tasty. Plants are vigorous, upright and productive. They also have good mildew resistance. They can take part shade to full sun.

46836 Crandall Black Currant \$4.99

Large black currants in clusters. Sweet tart flavor. Excellent for jam, syrup and juice. Five times the vitamin C of oranges. Upright, fast growing bush. Very productive. Ornamental yellow flowers with delightful fragrance lasting for up to two weeks in the spring. Ripens in mid-July.

59804 Jostine Black Currant x Gooseberry \$4.99

Jostine is a vigorous, disease-resistant thorn- less hybrid of black currant and gooseberry cross. Fruit is large to medium size berries, very good flavor, ripens midseason with high yields and keeps well on the bush. Justine shows very strong growth habit with a spreading bush. Jostine is resistant to Powdery Mildew, white pine blister rust, leaf spot and gall mite. Valuable for home gardens because of resistance and suitability for jams, jellies, and pies.

23178 Jostaberry Black Currant x Gooseberry \$4.99

Complex cross of Black Currant x Gooseberry. Large clusters of nearly black berries; looks like a gooseberry until ripe. Mild, black currant flavor but larger berry size. Higher vitamin C content than gooseberries. Excellent for eating fresh, jam, juice and cordials. Grows over 5 feet the second year. Self fertile. Yields of up 11 pounds per plant. Resistant to powdery mildews, fungal dieback and white pine blister rust.

59798 Gooseberry Black Velvet \$4.99

The deep purple fruits are the size of seedless grapes. They are very vigorous in growth. Flavor is very good to excellent when vine ripened. Black Velvet has won awards for its superb qualities and disease and mildew resistance. Plant 5 ft apart.

23174 Primus White Currant \$4.99

White currant. Compact bush bearing long fruit clusters. Bears up to 20 lbs of fruit per bush. Sweetest fruit of all currants.

23172 Redlake Currant \$4.99

Large, dark red berries on medium to large compact clusters. Excellent for jelly, preserves, and muffins. Strong and vigorous upright bush that will grow 4-6 feet tall and 2-5 feet wide. This currant is suitable for commercial and ornamental uses. Good for bird forage and windbreak plants. Red Lake is one of the most widely grown red currants. Early bearing; ripens in July.

46838 Wilder Currant \$4.99

Large clusters of dark red fruit. Very good quality. Healthy, vigorous, tall stemmed, heavy bearing bush. Prune heavily for best production. Bears over a long season during July. on two year and older wood. Long ripening season, holds well on the bushes.

Blackberries

13725-Boysenberry \$6.99

Very large, non-shiny, dark maroon berries. Soft, very juicy flesh. The Boysen has a distinctive, rich, tangy flavor and very aromatic. Excellent for eating fresh, juice, freezing, canning, pastries, and preserves. Ripens about July 1, and are among the largest of the small fruits. Vigorous, trailing vines. Boysenberries are hardy to approximately -10 degrees F. without protection. Hardy in zones 5-9.

13730-Boysen, Thornless \$6.99

Enjoy the large, sweet, juicy berries for two months as they keep ripening. The large reddish black fruit is up to two inches long. It is sweet and aromatic. Try eating them fresh with cream. They are delicious. The vine is trailing and vigorous.

13705-Logenberry, Thornless \$6.99

Hybrid between a blackberry and a raspberry with large, tart, dull-red fruit. It was developed in 1881 by US judge James H Logan.

59818-Ollalie \$6.99

Large, shiny, firm black berries. Sweet with some wild blackberry flavor. Vigorous and productive trailing thorny canes. Ripens in July. Developed in Oregon, but produces extremely well in California where the lack of day length and cold limit the productivity of some blackberries. Good for fresh eating, jams and freezing. Zone 6-.

SOLD OUT! 13715-Marionberry\$6.99

Medium to large, medium firm, sweet, bright, shiny black berries. Faint wild blackberry flavor. Excellent quality. Excellent for fresh eating; particularly recommended for desserts. Vigorous, thorny vines. Higher yields over a longer picking period than Boysenberry.

13318 Tayberry \$6.99

This is a Loganberry/ black raspberry cross. Juicy, cone-shaped, deep purple fruit up to 1.5” long. Firm core like a blackberry. Strong, slight tart flavor like loganberry. Fine for jam, jelly or homemade wine. Prickly vines grow 6-7ft tall and require strong support. Huge yields up to 12 tons per acre. Vigorous even in difficult weather and bad soil.

22806- Triple Crown \$6.99

Triple Crown Blackberry is the newest thorn less blackberry. This blackberry is named for its three crowning attributes: flavor - productivity - vigor The Triple Crown Blackberry ripens from about July 10 to about August 10. This blackberry variety yield large, glossy black fruits that are pleasantly firm and have the capacity to produce larger berries than any other variety we have seen.

Raspberries

41848 Amity \$2.99

Everbearing. Medium large, very firm, dark red berries. Classic raspberry flavor. Superior quality. Excellent for fresh, freezing and canning. Strong, self supporting canes

to 5 ft tall. Can take heavier soils, and has more resistant to root rot. Small crop in June and large crop I 'September and October.

59816 Autumn Bliss \$2.99

Everbearing. Attractive, red berries. Size, firmness and flavor and yields are superior to Heritage. Ripens two weeks ahead of Heritage. Very disease resistant. August September ripening.

52446 Bababerry Liner (not bareroot) \$13.99

The Baba berry plant is an unusual combination cross between a blackberry plant with a raspberry plant that are documented to have originated in California from an outstanding and unique hybrid bush that was found growing in isolation near a Monastery . The feature of most berry hybrids is an improvement that dramatically exceeds both parents that were involved, and the Baba berry bushes grow strong canes with rapidly increasing and sub-rhizomes that spread underneath the earth to multiply bushes. The Baba berry plant thrives in acid soils with an optimum pH between 5 and 6 with good aquatic drainage. The first crop of Ba Ba berries ripens in June, and the second in October.

SOLD OUT! 28222- Caroline \$2.99

Everbearing. Large, firm and cohesive fruit. Unique flavor with a special tangy twist. Long fruiting period. Shows good tolerance to root rot.

84735 Fall Gold \$2.99

This very vigorous gold raspberry is a beautiful hybrid that originated in Korea and is cold hardy. The large tasty berries are sweet as honey and are terrific for eating fresh off the bush or cooking. This raspberry is also popular to use as a garnish in restaurant desserts. The first crop matures in July and the second in September. Zones 5-8

84732 Heritage \$2.99

Introduced from New York State at Geneva in 1969. Large, sweet, dark red berries with a mild flavor. This superior quality berry is good for fresh eating, freezing, canning, and preserves. The canes are tall for an everbearing raspberry, but are very sturdy and seldom require support. Strong, vigorous, very productive, suckers prolifically and spreads rapidly. Fairly tolerant of heavier soils but will develop Root Rot in poorly drained areas. Moderate summer crop with heavier, superior fall crop. An excellent variety for the home gardener and also grown commercially in many areas.

83160 Indian Summer \$2.99

Everbearing. Large clusters of large, conic, glossy, high quality, aromatic, unusually sweet, bright red berries. Good for fresh eating, quick freezing and canning; makes a tasty jam. One of the earliest everbearers to ripen.

45828 Latham \$2.99

Spring bearing. Large to very large, round, often 1” deep red fruits. Wonderful texture; somewhat cohesive. Full flavored and aromatic. Good for fresh eating, canning, freezing, jam, juice and pie. Vigorous, heavily productive. Disease resistant. Ripens evenly for three weeks in late June and early July.

84717 Meeker \$2.99

Large, thimble shaped, firm deep, rich red fruit; high sugar content and superior flavor. Outstanding quality. Excellent home garden variety for fresh eating and freezing; also good for canning and processing. Long lived, vigorous plant with long, willowy growth. Very productive; long harvest season.

99279 Tulameen \$2.99

This British Columbia variety produces exceptionally large light red aromatic fruit that has a fine flavor. The fruit is 25% bigger than Meeker. Tulameen is also unique in that it extends the summer raspberry season through July and August. It produces for up to 50 days. It is a great find for backyard growers.

84720 Willamette \$2.99

Large to very large, long-conic, very firm, deep red fruit. Lower sugar content; rich, slightly tart flavor. Outstanding quality for table, canning or freezing. Tall, vigorous canes bear heavily. Disease resistant. Needs well drained soil.

Blackcap & Purple Raspberries

100800 Munger \$6.99

Although developed in the Eastern U.S., Munger has become the most widely produced variety in the Pacific Northwest accounting for almost all of the commercially frozen black raspberries processed today. Perhaps because it appears to show greater natural resistance to fungal diseases than other black raspberry varieties. Munger ripens mid season and has firm, shiny, average sized fruit

59812 Jewel \$6.99

Vigorous, erect, hardy, consistently productive, propagated by tip layers, slightly susceptible to mildew, no infections of anthracnose have been observed to date, winter injury has not limited production since selection. Ripens in mid-season, large, skin black,

glossy, slightly woolly, coherent, good quality, and firm. Fruit forms a fairly tight cluster at the tip of laterals, exhibits concentrated ripening, most of the crop can be picked in two to three pickings. The consistent good performance of 'Jewel' merits its release for commercial planting or home gardens.

Strawberries \$.45 ea \$4.86 per dz / \$34.56 Flat (8 doz.)

Albion

Everbearing This variety produces smaller amounts consistently throughout the production season. Albion has shown resistance to Verticillium wilt (*Verticillium dahliae*) and Phytophthora crown rot (*Phytophthora cactorum*). The fruit has outstanding flavor and attractive internal and external fruit color. This is a fairly new variety that has done well in both California and Colorado.

Chandler

June bearing. Large fruit is long-conic to long wedgy; glossy skin. Very firm flesh; very firm skin. Good dessert and freezing quality. Plants are semi-erect in growth habit. Runner production is excellent.

Monterey

Everbearing. A moderate day-neutral cultivar. It has great flavor (our favorite in our Miller Farms strawberry bed). Good leaf disease resistance, but a little susceptible to powdery mildew

Quinalt

Everbearing. One of the largest strawberries, often as big as teacups. Firm and deep red; tasty. Good for desserts, preserves and eating fresh. Not for freezing. Vigorous plants produce many runners. Will produce berries on unrooted runners. High yielding. Resistant to leaf spot, leaf scorch and root rot.

Seascape (Day Neutral)

The Seascape originated as a cross between Selva and Douglas. Highly tolerant of the virus diseases common in California, moderately susceptible to Leaf Spot. Fruit is symmetrically medium to long conic. Nice red color inside and out, with an attractive glossy finish. Noteworthy for high flavor, high yield, large fruit size, firmness, symmetry, attractive appearance and general flexibility in planting requirements.

Sequoia (June Bearing)

Very large, dark red berries, good flavor. Fair to good quality for dessert / freezing. It is actually an extremely long season Spring Crop when grown as far North as Oregon. In

areas safe from early frost, Sequoia is the earliest Spring Crop on the market and it keeps bearing fruit several weeks after the typical Spring Crop is gone. Hardy in zones 6-9.

Tri Star (Everbearing)

Sweet and aromatic. Produces a heavy, very early spring crop of small to medium short conic fruit. Cool fall weather will bring larger, more elongated fruit. Fall crop is the heaviest. Berries have firm, glossy, deep red skin with solid, medium red flesh. Excellent Flavor. Also recommended for freezing. Medium size plants, moderate number of runners which will bloom and bear fruit before rooted. Good for hanging baskets. Resistant to Red Stele and Verticillium Wilt. Tolerant of Leaf Scorch and Leaf Blight. Well adapted to the Pacific Northwest.

Artichokes

13675 Green Globe \$4.99

17598 Jerusalem \$1.79

Asparagus

84711 Jersey Knight \$.89 each

Male hybrids with fewer female seed plants than are found in open pollinated varieties. These varieties are high yielding, have excellent fusarium tolerance and high resistance to rust. They have a large attractive spear. Due to greater disease resistance and less expenditure of photosynthate forming seed, live longer than male - female varieties.

39794 Mary Washington \$.69 each

Rust resistant. Most tender of all asparagus varieties. Used by most commercial growers and extensively used by backyard gardeners. Plants form large, clean shoots, which are thick and heavy. Long and straight. Color is a rich dark green, slightly tinged purple at the tightly folded tips. Uniform heavy yields. Plant 15 roots for each family member.

84714 Sweet Purple \$.89 each

This new type of asparagus has many similar characteristics to green asparagus but offers something new for the asparagus connoisseur. The spears produced have several qualities which make it quite different from common green asparagus.

1. The deep-burgundy coloration produced in these spears is the most striking difference between the purple and green varieties.
2. This type has a 20% higher sugar content. Because of this extra sweetness, this vegetable is often eaten raw. Some upscale restaurants garnish salads with purple asparagus. When cooked, the sweetness gives this asparagus a mild, nutty flavor.

3. The spears are generally larger and much more tender than its green counterpart. The vascular bundles have less lignin per spear which make the spears less stringy. This allows the cook to use the entire spear with little waste.

13685 U.C. 72 Asparagus \$.99 each

An all male variety with smaller spears than the Jersey Knight.

Hops \$6.39 each

84795 Nugget

Nugget is a bittering-type cultivar, bred in 1970. The lineage of Nugget is 5/8 Brewers Gold, 1/8 Early Green, 1/16 Canterbury Golding, 1/32 Bavarian and 5/32 unknown. Tolerant to downy mildew, and powdery mildew. Pickability of a medium-size, compact cone. Used for its bittering potential plus aromatic properties similar to Northern Brewer.

51918 Willamette

This variety is a hybrid of the English Fuggle hop. They are a popular American flavor hop variety known for their earthy aroma and pleasant taste in a finished beer. Improved Type. Excellent all purpose hop with 4-6% bitterness. Good Disease resistance.

Horseradish

84792 Horseradish \$2.39

The standard variety for condiment use. Large, white roots make gourmet sauce--chop and mix with vinegar. Ready to harvest after one year in your garden. Grows vigorously and produces large white roots. Does best in cool, moist fertile soil. Plant the roots outdoors in the spring as soon as the soil can be worked. Plant with the thick end up, upright or horizontally about 18 inches apart. Horseradish is a perennial, but many gardeners replant every 3 to 5 years, as old roots tend to get woody.

Rhubarb

84789 Crimson Cherry \$6.29 (jumbo roots)

Also known as *Crimson Red*, *Crimson Wine*, *Crimson*. This is reportedly the only variety of consequence in Oregon. It produces brightly colored Red stalks with the unique characteristic of being Red throughout under normal temperature and moisture conditions of the Pacific Northwest.
